HOLIDAY HOMEWORK 2018-2019

Subject: PSYCHOLOGY Class: XI

Project on any one of the following:

- Conduct a survey of the "after school activities" of class-V and class-IX students taking a sample of 10 students in each. Find information about the time devoted by them in various activities such as studying, playing, television viewing etc. What conclusions do you draw and what suggestion would you prefer? Compare both the group.
- Conduct a study in your group to see the effect of recitation on learning poetry. Take 10 six year olds and divide them into two groups. Give group-1 a new poem to learn and instruct them to read it loudly for 15minutes. Take Group-2 and give them the same new poem to learn and instruct them not to read it loudly. After 15 minutes ask the two groups to recall. Care needs to be taken to see that both the groups are dealt with separately. After the recall has taken place, note down the observation and compare the results of both the groups.
